WESTERN DISTRICT OF WASHINGTON

BY

Pre-facet I

The urgency of unstoppable crimes and contempt for life, where the individual (right person) obligated to homelessness years before, and particularly, under severe conditions since year 2011; to lack of proper health treatments, basic necessities including nourishments, as well as any consideration but unlimited verbal, moral, physical, psycho-social and nature abuses. In the way the man can not avoid and equals and like's declaration.

For example, at own places; when/after changing place or state; with known country persons; with roommates; under rent; in secure shelter; in open shelter; and even on the street, or in general at all places under abuses and exploitation; on-purpose limitation and forcing to accept wrong as right, and granting forcefully over taken rights and names to others (suspects) and to be consented for imposed enslavement as own interest.

On other side, lack of any rights, including family authority exposed my child to preventable abuses and exploitation; due to on purpose isolation, illegitimate protection orders as well as denying means (among many) rights - the rights of the child and/or her father, to disable actions and protections could be taken by father (me) to provide better means for the abused child.

Even under partial health, occasionally, attempts to best earnings for very necessities have been hindered and truly exposed to unnecessary retention of payments, assignment at wrong places or extra abuses in the way direct privileges to former attackers and also against my rights; where not for weeks or months, for years I forced to live under unlimited harassments, abuses, homelessness, starvations and frames as well as reducing to none without reason; until now and this time.
